### DETAILED ACTION

1. The timely submission under 37 CFR 1.129(a) filed on 8/7/2006 is not fully responsive to the prior Office action because applicant's response to the election requirement is non-responsive since it does not elect a specific group of claims, but instead elects all the claims. In order to clarify the election requirement, examiner is re-submitting the requirement with indications of which claims belong to each of the patentably distinct groups. This is provided with the intention of clarifying the requirement so that applicant may select an appropriate group of claims. Applicant is reminded that one of the specific groups of claims must be elected in response to this requirement, and that an election of all the claims of record will not be considered responsive, and may result in holding of abandonment.

Since the submission appears to be a *bona fide* attempt to provide a complete reply to the prior Office action, applicant is given a shortened statutory period of ONE MONTH or THIRTY DAYS from the mailing date of this letter, whichever is longer, to submit a complete reply. This shortened statutory period supersedes the time period set in the prior Office action. This time period may be extended pursuant to 37 CFR 1.136(a). If a notice of appeal and the fee set forth in 37 CFR 1.17(e) were filed prior to or with the payment of the fee set forth in 37 CFR 1.17(r), the payment of the fee set forth in 37 CFR 1.17(r) by applicant is construed as a request to dismiss the appeal and to continue prosecution under 37 CFR 1.129(a). The appeal stands dismissed.

*Election/Restrictions*

2. This application contains claims directed to the following patentably distinct species:
  - A. species I drawn from pg. 4, lns. 12-pg. 5, lns. 15 and pg. 6, lns. 18-pg. 7, lns. 9 of specification; Claims 29, 30-34, 40-41, 42-46 and 52-53, drawn to a file server for deleting a read-only snapshot copy of the production file.
  - B. species II drawn from pg. 5, lns. 4-13 and pg. 7, lns. 10-21 of specification; Claims 35-37 and 47-49, drawn to a file server for responding to a request to create a production file by reserving for the production file a free file blocks.
  - C. species III drawn from pg. 5, lns. 14- pg. 6, lns. 3 and pg. 7, lns. 22- pg. 8, lns. 11 of specification; Claims 38-37 and 50-51, drawn to a file server for restoring the production file.
  - D. species IV drawn from pg. 6, lns. 4-17 and pg. 8, lns. 12-pg. 9, lns. 2 of specification; Claims 1-28, drawn to a file server for refreshing a snapshot copy by creating a new node in the version set.

The species are independent or distinct because the species as claimed have different mode of operation and a materially different design.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.
4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
6. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
